EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Mark S. Cohen on 9/13/04.

The application has been amended as follows:

In the claims:

Claims 24 and 43 are cancelled. The following claims 23, 42 and 45 have been amended.

Claim 23. (Currently amended) A method of repairing or forming a cartilage in a subject comprising the steps of:

obtaining a mesenchymal stem cell from the subject;

transfecting said mesenchymal stem cell with a recombinant vector comprising a nucleic acid sequence encoding a Brachyury protein, so as to obtain an engineered cell which expresses a Brachyury protein; and

administering said engineered cell to the subject at a site of cartilage damage in the subject,

wherein said engineered cell differentiates into chondrocytes and thereby repairing or forming cartilage in the subject.

Art Unit: 1636

Claim 42. (Currently amended) A composition comprising an isolated, engineered mesenchymal stem cell which expresses a Brachyury protein and a pharmaceutically acceptable carrier.

Claim 45. (Currently amended) The composition of claim 42, wherein said mesenchymal stem cell further expresses a factor which upregulates expression of the Brachyury protein.

Examiner's Comments:

In the amendment filed on 6/24/04, on page 2, the rewritten paragraph replaces the paragraph 0096 at the bottom of page 22 in the specification, rather than at the beginning of page 22 as indicated.

Upon further consideration, the instant claims were given the priority date of 8/18/1998.

Art Unit: 1636

REASONS FOR ALLOWANCE:

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a composition comprising an isolated, engineered mesenchymal stem which expresses a Brachyury protein and a pharmaceutically acceptable carrier; and a method of repairing or forming a cartilage in a subject as claimed. Accordingly, the claims are allowable over the prior art of record.
